IDENTIFIERS *Library Statistics

ABSTRACT

This compilation of annual reports of 151 New York State institution libraries for the year ending March 31, 1980, presents data on total resident population, library materials, dollar expenditures, and weekly staff hours. The types of institutions represented include correctional services, division of substance abuse services, education, health, office of mental health, office of mental retardation, and developmental disabilities and youth. In a separate table, a comparative summary indicates annual library expenditures for salary, materials, and other categories by institution type since 1973, including percentages of increase and decrease. Appendices comprise a key to the abbreviations used; a directory of state institutions which includes their addresses, the state department and system with which they are associated, and the names of both the librarian and the head of the institution; and a list of public library systems showing the institutions in the same geographical area. # PREFACE

There has been a remarkable improvement in the number of institutional librarians returning the library Annual Report form to Library Development for this publication. We wish to make a few observations concerning this change which has greatly helped in the compilation of statistical data by Library Development. Firstly, institutional librarians have become more aware of the importance of submitting the library Annual Report to Library Development because it provides basic information on institution library services and gives greater visibility to their programs and efforts. Secondly, the changes taking place in the priorities and directions of State institutions have provided institutional librarians the opportunity to show State, agencies, superintendents, and directors the unique and special service libraries can provide to the resident.

The figures in the following tables were compiled exactly as reported aside from minor adjustments for internal consistency and correction of mathematical errors. Many institutions having more than one library have reported combined figures for all library services in the institution. Where separate figures were submitted, they have been reported separately.

Because these statistics do not cover institutions operated by counties and cities, they do not show an important program which began in 1973 as a result of a $100,000 appropriation by the State Legislature under which library service is provided by public library systems to county jails and penitentaries, juvenile secure detention facilities, and facilities of the New York City Department of Correction. In spite of the appropriation having been reduced to $50,000 in 1974, the public library systems are fostering a wide range of programs to correctional facilities.

It is our hope that the information contained in this publication will help to promote these local services and play a supportive role in securing additional funding. Certainly this publication will aid in identifying this community of dedicated people providing such a wide range of programs and services.

We wish to express our thanks and appreciation to the librarians and other officials who supplied Library Development with the statistical data which makes this publication possible.

Corrections or comments on Institution Libraries: Statistics/1979-80 will be welcome, and should be addressed to:

[1]The statistics are taken from Institution Library Annual Reports. Statistics for 1977 are not available. Division of Substance Abuse Services Statistics are omitted because of insufficient data.

[2]Effective April 1, 1978 Mental Hygiene was reorganized into three autonomous agencies, the Office of Mental Health, the Office of Mental Retardation and Developmental Disabilities, and the Office of Alcoholism and Substance Abuse.

[3]The Office of Mental Retardation and Developmental Disabilities statistics are included in Mental Hygiene statistics from 1973 to 1978. Thus, there are no separate statistics available for 1973-78.
